EDUCATION

National Institute of Technology, Surat

B.Tech, Computer Science and Engineering

Surat, Gujarat

CGPA:7.35 | July 2020 – July 2024

EXPERIENCE

System Analyst

National Stock Exchange of India Ltd.

July 2024 – Present

Mumbai, Maharashtra

- Monitored and analyzed security events using **Splunk SIEM** and **ITRS Geneos** to detect anomalies, suspicious activity, and potential security incidents
- Investigated and managed security incidents through **ServiceNow (SNOW)**, ensuring proper triage, escalation, and resolution within defined **SLAs**
- Ensured compliance with internal policies and documentation standards
- Performed **log analysis** across application, system, and server logs to identify **indicators of compromise (IoCs)** and access control issues
- Assisted in **vulnerability identification** including misconfigurations and weak authentication patterns
- Collaborated with development and infrastructure teams to remediate security findings, strengthen system security, and reduce attack surface

Research Intern

NIT SURAT

January 2024 – July 2024

Surat, Gujarat

- Conducted in-depth research on **Cross-Site Scripting (XSS)** vulnerabilities and mitigation strategies.
- Performed manual testing to identify Cross-Site Scripting (XSS) vulnerabilities in web application inputs.
- Tested **Reflected, Stored, and DOM-based XSS** using crafted payloads to validate vulnerability presence.
- Analyzed application behavior to understand the root cause of XSS vulnerabilities.
- Documented **findings, attack scenarios, and security impact** as part of the internship report.
- Authored and presented a **research paper on XSS vulnerability analysis** at the **4th ICISPD-25 Conference**.
- Recommended secure coding practices including **input validation, output encoding, and CSP implementation**.

PROJECTS

Aatm Nirman - Django Website | *Python, Django, Bootstrap, Mysql*

June 2021 – July 2021

- Developed a full-stack web application using with **authentication, admin dashboard and database integration**.
- Implemented **secure input handling and access controls** aligned with OWASP guidelines.
- Gained hands-on experience in **secure application architecture**.

Object Identification Application | *Python, AI/ML, Django*

May 2022 – June 2022

- Built an **image recognition** platform using Python and Django.
- Key Features includes **Advanced Object Detection Algorithm, Real-time Object Recognition, Responsive Design** etc.

TECHNICAL SKILLS

Languages: Python, Bash scripting, SQL, C , C++ , HTML/CSS

Frameworks: MITRE ATT&CK, OWASP Top 10, Django, Bootstrap

Tools: Splunk SIEM, Snort, Nmap, Metasploit, Wireshark, John the Ripper, Burp Suite, Git, PyCharm

Security Domains: SOC Operations, Incident Response, Log Analysis, Web Application Security, Network Security, Vulnerability Assessment & Threat Detection
