SUMMARY

I am a dedicated System Analyst with hands-on experience in production support within the finance sector. With proficiency in technology and incident management, I excel in providing solutions that enhance system performance and reliability. My passion for information security and continuous learning motivates me to stay abreast of the latest trends. I am committed to optimizing operations and contributing positively to my team's success

EXPERIENCE

System Analyst

NSE India

📅 01/2025 📍 Mumbai, Maharashtra, India

An organization focused on providing a transparent and efficient market for different securities

- Provided 24x7 production support for critical trading applications, ensuring continuous system availability
- Worked hands-on with incident management tools to resolve production issues within SLA timeframes
- Managed production servers and infrastructure, performing regular health checks and preventive maintenance
- Monitored system performance and responded to alerts, minimizing downtime during market hours
- Collaborated with development teams to troubleshoot and resolve production defects efficiently
- Created detailed documentation for recurring issues and their resolutions to improve team knowledge base (SOP)

Technology Trainee

NSE India

📅 07/2024 - 01/2025 📍 Mumbai, Maharashtra, India

An organization focused on providing a transparent and efficient market for different securities

- Learned the company's production support architecture and incident management workflows
- Understood how different departments coordinate during critical production incidents
- Studied my department's application architecture focusing on monitoring and alerting mechanisms
- Gained knowledge of market-specific production support requirements and compliance standards
- Developed skills in log analysis and system monitoring tools for early detection of production issues
